Subject: Re: Dimock Monitoring

Cindy: You are correct. This internal IH monitoring event was planned well in advance of this particular project and was not in any way a direct response to your Lab's efforts related to accepting and analyzing Dimock samples. Your staff's current work on that particular set of samples was merely a coincidence for our IH monitoring project, since we were looking for active work being performed with the solvents we had previously chosen to monitor for potential laboratory exposures.

Susan: Probably an unfortunate choice for a title of a good note otherwise... Please resend the original note and use "ESC Industrial Hygiene Air Sampling" as the title.

Thanks,

Skip

Subject: Re: Dimock Monitoring

I disagree with the title of this email "Dimock Monitoring." It was my understanding that the IH monitoring was planned in advance of this particular project and was not in direct response to our efforts related to accepting Dimock samples. Since you have requested response via email please discuss with Skip on the proper title of this monitoring effort and possibly resend so the title is correct in all future emails.

Subject: Dimock Monitoring

Good morning.

For those of you that participated in yesterday's monitoring for methylene chloride, methyl alcohol, hexane, and/or acetonitrile with passive or active monitors, would you please respond to this email and briefly describe your day (i.e., I worked in the lab approximate 4 hrs from 0800 - 1200, I participated with a passive monitor for hexane).

Your cooperation this whole week is greatly appreciated. Please feel free to contact us if you have any questions, suggestions, and/or concerns.

Thanks

Susan
